Seven days Weather Forecast

10th– 16th October, 2017

GENERAL SITUATION

The period from 10th – 13th October, 2017, moist and unstable winds from the North-west will be affecting the whole Zambia resulting in fairly cloudy, hazy and warm to hot weather conditions with thunder and rain in some places. From 14th – 16th most parts of the country will be under the influence of air flow from the South east resulting in few clouds, hazy and hot weather except for North-western and Luapula provinces which will be affected by moist and unstable winds from the North west causing showery activities.

Forecast for the period 10th - 13th October, 2017

All Areas: Few clouds and warm in the morning becoming cloudy and hot in the afternoon with thundershowers in some places.

The nights will be cloudy, warm with rain and thunder in a few places.

Forecast for the period 14th - 16th October, 2017

Luapula and North-western Provinces: Few clouds and warm in the morning becoming cloudy and hot in the afternoon with thundershowers.

The Rest of Zambia: Mainly sunny, hazy, warm becoming hot with few clouds in the afternoon.

The nights will be mainly clear and mild.
