

ZAMBIA EVENING WEATHER FORECAST: SUNDAY (27/09/2026)

SUMMARY:

A moderate and relatively moist easterly airflow is influencing weather conditions over most parts of the country, resulting in generally hot conditions. Meanwhile, the northern parts of the country are being influenced by a northwesterly airflow, which is contributing to isolated rainfall activities.

FORECAST FOR TONIGHT: SUNDAY (27/09/2026)

Copperbelt, Luapula, Muchinga, Northern and Northwestern Provinces including the western parts of Western Province: Partly cloudy, windy at times and mild with a chance of rain especially over the northern parts of Northwestern.

Central, Eastern, Lusaka and Southern Provinces including the eastern parts of Western Province: Mainly clear, windy at times and mild.
