

ISOLATED RAINFALL EXPECTED IN PARTS OF WESTERN ZAMBIA

Urgency: Expected

Severity: Moderate

Certainty: Likely

Issued:

Mon 20 Apr 2026
14:07

Effective:

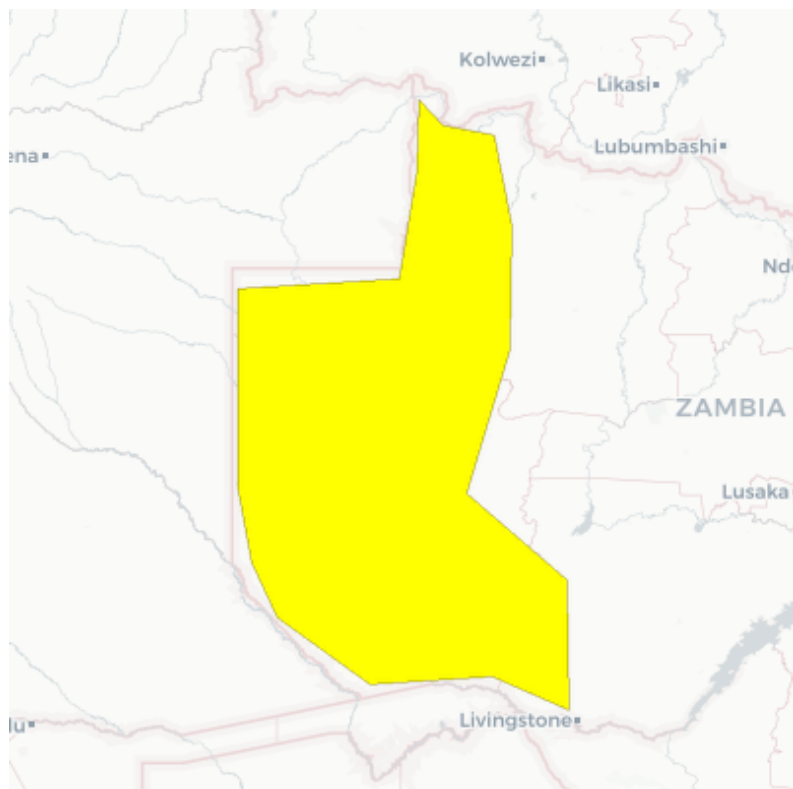

Mon 20 Apr 2026
14:30

Onset:

Mon 20 Apr 2026
14:30

Expires:

Wed 22 Apr 2026
13:00

Area:

Western Zambia

Description:

Moderate rainfall is expected to affect the western parts of Zambia covering parts of Western and Northwestern Provinces. This is likely to damage already harvested crop in these areas.

Instruction:

Farmers are advised to cover there already harvested crop to avoid damage. Seek advise from local Agricultural Extension Officers and ensure you get authentic weather updates from the Zambia Meteorological Department.
